CHILE

Northern Andes or Puna

It is now a proven fact that very high peaks in this region were ascended by subjects of the Incan empire, in pre-Columbian times. Besides, more ascents may have been made in the 18th and 19th centuries by local miners and hillmen. Therefore, most claims for a first ascent should be regarded as only provisional. Peaks on the Bolivian and Argentinian borders have been included in this chapter.

930. *Nevado Ojos del Salado*, 6885 m., 22,590 ft. 9. R. Kanai, S. Kunstmann, P. Rosende, T. Takeshita, 12.19.1970. *AAJ* 1972, p. 178.

Skaramauskas, C. Siewczynski, 4,1953; *ACAB* 22 [1954], pp. 36-44. In *RA* 86, cover, the second ascent of this peak is credited to M. Shepeler, E. Vicens, no date given).

ARGENTINA

Northern Andes or Puna

As in the Chilean side of the Puna, very high peaks were ascended by subjects of the Inca empire in pre-Columbian times. Local miners and hillmen also may have been active in later centuries. Most claims for a first ascent should be regarded as only provisional. Peaks on the Chilean border have already been included in the Chilean chapter.

1039. *unnamed* (Nevado del Cazadero), 6600 m., 21,851 ft. 1. S. Kunstmann, P. Rosende, K. Takeshita, 12.14.1970. *AAJ* 1972, p. 178.
(*Note*: this peak corresponds to the one hitherto known with the unofficial name of Nevado Walther Penck).

(*Note*: this peak is often listed in charts as 6850 m.).
1041. *unnamed* (Los Perdidos), 6300 m., 20,670 ft. 1. Same information as for nr. 1039, but 12.12.1970.
(*Note*: it is not clear whether this peak is located on the border or in Chilean or Argentinian territory).
1042. *unnamed* (Olivares group), 6215 m (?), 20,390 ft. 1. S. Fernández, E. and G. de Lara, C. Flores, V. de la Terza, M. Yacante 12.30.1965. *ACAM* 2 (1965), pp. 26-30.
(*Note*: the Olivares or Porongos chain contains several summits over 6000 m. In 1972, a Chilean group ascended point 6252 m., the highest, and claimed it as a first ascent, having found no traces of a previous climb. The Argentinian party, in its report quoted above, produced the picture of a higher peak, located on

- the border which may correspond to the peak ascended by the Chileans. In Argentinian charts, Olivares is mentioned as 6215 m. high and within Argentinian territory).
1043. *Nevado Negro Overo*, 6150 m., 20,177 ft. 1. Revised and complete list of traceable ascents should be as follows:

Central Andes

Mendoza, Ramada, Totorá and Ansilta districts are included. Peaks on the international border have been already listed in the Chilean chapter. First ascents only.

1060. *Cerro Negro* (Cerro Pabellón), 6152 m., 20,155 ft. 1. C. Andoh, F. Lucero, M. Murata, 1.2.1969. *S* 1969, pp. 6-7 and *AAJ* 1970, pp. 174-5.
(Note: there is a claim by an Argentinian party as having done for the first ascent in 1953. See *AAJ* 1963, p. 443, entry 703. The party mentioned above found no traces of previous ascents on the top, according to personal information to the writer from the leader, T. Kawakami. It is believed that the 1953 party ascended the lower summit, 6140 m. high, of Cerro Negro).
1061. *unnamed*, ca. 5900 m., 19,357 ft. 1. R. Arciácono, J. Bello, E. Fiorentini, 1.10.1964. *LM* 6 (1965), p. 19 and *AAJ* 1965, p. 461.

(Note: the name "Excelsior" was given to this mountain in the first ascent, but previous names, also unofficial, existed).

Patagonia

Since this area is largely unsurveyed, the location of peaks and whether they fall in Chilean or Argentinian territory has been disregarded.

1095. *San Valentín*, 3876 m., 12,716 ft. 2. P. Gresham, C. Lucero, G. and R. Vickers, 12.23.1969. *AJ* 1970, pp. 225-30 and *AAJ* 1971, pp. 429-30.

(Note: the name 'Titlis' was unofficially used for this peak by previous expeditions).
1097. *Cerro Arenales*, 3437 m., 11,277 ft. 4. E. García, M. Gómez, C. Marangunic, E. Shipton, 12.27.1968. *AJ* 309, pp. 183-90 and *AAJ* 1965, pp. 456-7.

1098. *Cerro Lautaro*, 3380 m., 11,089 ft. 1. L. Pera, P. Skvarca, 1.29.1964. *LM* 6, pp. 78-82, *ACAB* 1967, pp. 7-18 and *AAJ* 1964, p. 223.
1099. *Cerro Fitz-Roy* (Chaltén), 3375 m., 11,072 ft. 2. C. Comesaña, J. Fonrouge, 1.16.1965. *AAJ* 1965, pp. 45-7.
3. Y. Chouinard, D. Dorworth, C. Jones, L. Tejada-Flores, D. Tompkins, 12.21.1968. *AAJ* 1969, pp. 263-69.
1100. *unnamed*, 3270 m., 10,728 ft. 1. M. Serrano, J. Skvarca, 3.3.1969. *LM* 13 (1969), pp. 4-6 and *AAJ* 1969, pp. 446-7.
(Note: mountaineers who made the first ascent of this mountain have referred to it variously as Vivod, Roma and Romano).
1101. *Cerro Bertrand*, 3200 m., 10,499 ft. 1. J. and P. Skvarca, 2.11.1966. *ACAB* 1967, pp. 36-9 and *AAJ* 1966, p. 188.
1102. *Cerro Pico Sur*, 3110 m., 10,200 ft. 1. C. Lucero, R. Vickers, 12.24.1969. *AJ* 1970, pp. 225-30 and *AAJ* 1971, pp. 429-30.
(Note: the name quoted above is official and appeared in Chilean charts since 1903. During the first ascent, the peak was renamed "Pamir").
1103. *Cerro Hyades*, 3070 m., 10,099 ft. 1. C. Bibby, R. Gunn, P. Launder, J. Nankervis, 1.7.1970. *AJ* 1970, pp. 225-30 and *AAJ* 1971, pp. 429-30.
1104. *Cerro Murallón*, 3060 m., 10,040 ft. 1. (?). J. Ewer, E. García, C. Marangunic, E. Shipton, 1.23.1961. *AJ* vol. 67, p. 257 and *AAJ* 1962, pp. 119-128.
(Note: in sources quoted, as well as in *AF* 1961, pp. 115-36 and *ACAB* 1963, pp. 71-2, it is stated that the party mentioned above reached only the two central summits of the summit ridge. In the mid of the mist and sleet it was not ascertained if this was the highest point).
1105. *Cerro Mellizos*, 3050 m., 10,007 ft. 1. G. Ahcin, J. and P. Skvarca, J. Vodnig, Jan. 1965. *LM* 7 (1965), pp. 67-8 and *AAJ* 1965, p. 458.
(Note: the name quoted above is official and appeared in Chilean charts. However, the climbers mentioned above felt that this name, which in Spanish means "twins" should apply to two peaks, but in their opinion Mellizos is an isolated single mountain. The climbers proposed for it the name "Steffen", but this name had already been given to another mountain in northern Patagonia. Besides, it should be stated that in A. de Agostini's book, *Andes Patagónicos* [Buenos Aires, 1945, pp. 280-3], the two peaks of the Mellizos group show clearly, seen from the Santa Lucía valley).
